International Institute  
of Research & Wealth Management

International Institute of Research and Wealth Management (IIRWM) is a Premier Institute for Research and Wealth Management which has been consistently delivering the Best Education in the Banking and Financial Services having started our journey from Eastern India.

Pioneers in Industry Interaction, IIRWM draws its success from the concept of Industry being involved with its candidates on a day to day basis, giving them the practical exposure to the BFSI Industry which enhances their learning and understanding.

IIRWM evolved from the need to provide quality education to satiate the need of a rapidly evolving national and regional economy. Our Founders — who aimed to create opportunity, value and experience in their chosen fields — envisioned coaching and training for Courses which had a practical and industry-oriented syllabus. The idea was to create Candidates who could be instrumental in the growth of their respective organizations right from day one. Built on a strong bulwark of academic and corporate interface, IIRWM aims at creating young leaders with an understanding of evolving economies, and who can handle local changes from a Global perspective.
